For this pattern, I recommend using a medium-weight knit fabric with a content of 95% Cotton, 5% Lycra/Spandex. Having at least 5% Lycra or Spandex allows the fabric to have elasticity and bounce back to its original shape without getting stretched out over time. To determine the stretch of your fabric simply stretch a 2-inch piece of the knit fabric in one direction and repeat this process in the opposite direction. Choose the direction of the greatest stretch to go around the head. This means that you cannot use a normal stitch instead of a stretch point or light when sewing with mesh fabric. I didn't want this wire to have been around when I started stitching with mesh fabric. I didn't want this wire to have been around the chapé u using a 3/8 inch seam margin. If you don't feel like sewing around the complicated chap, try putting the needle in the bottom position and lifting the presser pan to rotate the tissue around the curves.
